FIRE SPRINKLER GUARD AND ESCUTCHEON PLATE COMBINATION

FEATURES

- A new innovation that is easy to use
- Comes in white with other colours optional and is re-usable
- Can be installed before or after sprinkler heads are configured saving them from being knocked accidentally whilst the fit out of a building is being carried out.
- Can be used under escalators and storage rooms where customers and tenants could knock their heads or portable equipment can damage sprinklers.
- Excellent for refit and demolition projects. Guard the sprinkler then drain down and remove. Can be reused as the job progresses
- New factories and racking systems.
